

## *User guide*

Project information	
Project	Cyber Library
Project Time-frame	15 weeks
Summary	Create a secure environment for teachers and students to share ideas, files, and assignments through mobile access and messaging.
Process impact: This plan will be used to evaluate and manage the project. Key assumptions that affect the plan should be documented here. The project plan should be updated throughout the life-time of the project.	

### **1- Introduction**

Cyber Library is one of the best solutions for approximately 20 million teachers and students in Vietnam with innovative new features. Book, image and interactive material like video, along with forum for discussion and requesting are all supported. Besides, friendly user interface with Vietnamese language will be a great point.

This User Guide will help users get used to Cyber Library with some basic actions by step-by-step instructions.

### **2- Register as a new user**

- Visit login page
- Click register button
- Enter identifying information: username, email, password
- Submit form
- Return to main page (automatically), login

Alternative scenario extensions:

- If username has already been taken, display error message
- If mail is invalid, display error message
- If password is invalid or not match, display error message

### **3- Change personal information**

- Login
- Click setting
- There are 3 choices (change profile, change password, change avatar), choose the one you want
- Fill in the related form

- Save change

#### **4- View user profile**

- Visit some page that contains username which is automatically linked with that user's profile page.
- Click the user name that you want to see more information
- Profile will be shown with name, age, short description of him/her if available
- Can request to be friends

#### **5- Upload**

- Login
- Visit user page
- Click upload
- Choose one of options of uploading book/image/video from user's computer or other source
- Fill in the form
- Submit

Alternative scenario extensions:

- Title and content directory/ link must be filled in, otherwise, display error message
- The type of the file you choose to upload must match the content (e.g. you can't choose 'book upload' and then upload an image), otherwise, display error message

#### **6- View/ download**

- Visit library page by clicking 'library' button
- Choose what kind of content you want to view (books, images, videos)
- Choose a specific one listed in table
- If that type of file is supported, watch it directly on the current page
- Download or like the file if you want

#### **7- Create a thread in Cyber Library's forum**

- Login
- Click 'forum' button

#### Group 4 – Software engineering project Cyber Library – Documentation

- Choose the box in which you want to create a thread (books request, videos request, images request, chuyện trò linh tinh, feedback)
- Fill in the box Subject
- Click ‘New thread’

Alternative scenario extensions:

- If the box Subject is not filled in, no thread is created
